

YP Global Premium Module

1. The YP Global Premium Module is designed to simplify the application process with the support of our experienced mentors. While we strive to offer the best guidance, we cannot guarantee 100% selection of the student. The final selection depends on the student's profile and the availability of positions. Students are encouraged to put in their efforts to improve their chances of selection.
2. The PhD application process varies between Pool 1 (USA, Canada, Singapore) and Pool 2 (European countries, Australia, New Zealand, Japan, etc.). Mentoring will be customized according to the student's preferred pool.
3. For Pool 1, mentors will assist in shortlisting 30 professors, sending emails, and finalizing 8 universities. The list of 30 professors will be agreed upon mutually by the student and mentor. If a student chooses to reject the shortlisted professors, mentors will provide up to 20 additional professors. However, if the request is genuine, mentors may provide assistance with more than 50 professors, at their discretion.
4. For Pool 2, mentors will assist in shortlisting 30 open PhD positions and filling out application forms as promised. We aim to provide the best guidance to help you reach the interview stage, but there is no guarantee of an interview call or final selection.
5. If the student wishes to apply to both Pool 1 (USA) and Pool 2 (Europe), they will receive support for 15 professors from Pool 1 and 15 open positions from Pool 2, or as agreed upon through discussion with the mentor.
6. Students will receive drafts of their Statement of Purpose (SOP), cover letter, and Curriculum Vitae (CV) depending on processing time. We follow a queue-based system, and documents are processed in the order they are received. On average, it will take two weeks to prepare your documents.
7. Students should include specific information as suggested by the mentor to improve their chances of selection. If students want to add university-specific information to the SOP or cover letter (such as details about different labs, communities, etc.), they will need to do this themselves.
8. Students will receive one set of documents, including a single Statement of Purpose (SOP), a Curriculum Vitae (CV), a cover letter, and a set of three Letters of Recommendation (LORs). Students can use these documents for different universities by making minor changes. A mentor has the right to refuse further reviews after eight document reviews.

9. After receiving the final draft from the mentor, it is the student's responsibility to proofread all the documents and then upload the final documents to the assigned Gmail drive before mentors start emailing to the professors.
10. Mentors will not provide a research proposal. If required for the application, the student must write it. Mentors can assist by providing the structure and some insights into writing the research proposal.
11. Mentors are responsible for sending the initial email to the professor. Once the professor replies, it is the student's responsibility to continue the conversation.
12. If a mentor completes a university application with the student's consent but the student fails to pay the fee or upload necessary documents (e.g., research proposal) before the deadline, it will be considered a completed application.

Responsibility and Liability:

- You are responsible for providing accurate and truthful information for document preparation and applications.
- We are not liable for any errors or omissions in the documents if the information provided by you is inaccurate or incomplete.

Termination of Service:

- We reserve the right to terminate your services if you violate these terms and conditions or if we find any misuse of our services.
- In the event of termination due to misuse, no refunds will be provided.
